

Solulyte

A Liquid electrolyte, **complementary feed for poultry**, to be diluted in the drinking water. The addition of Solulyte to poultry diets may help stimulate water consumption following vaccination, drug treatment and disease challenge, along with enhancing early feed consumption and stimulation of appetite. Solulyte also aids stress resistance during and following transportation and at other times of changing environments. Solulyte also provides a readily available source of body salts (Sodium, Potassium) to compensate for losses due to hot weather.

Ingredients	Quantity/ litre
Sodium chloride	19.63g
Potassium chloride	164.85g
Citric acid	6.56g
Magnesium Sulphate	0.91g

Directions

Dilute 1 Litre of Solulyte in 500 Litres of clean drinking water.

Recommendations

- Use day old to 5 days
- 3 days prior to vaccination/drug treatment
- 3-5 days during diet programme change
- At times of disease challenge, peak production and other stress factors
- During periods of heat stress

ANALYTICAL CONSTITUENTS

Moisture	82.3%
Ash	2.1%
Oil	<1%
Protein	<1%
Fibre	<1%
Sodium	<1%
Magnesium	<1%

COMPOSITION

Water, Potassium Chloride, Sodium Chloride, Magnesium Sulphate,

ADDITIVES (PER KG)

Technological Additives

E330 Citric Acid 6g,

Sensory Additives

2b permitted flavour 1000mg

Vitamins

3a Riboflavin 5.Phos.Sod 5mg

Product Name:	Solulyte		
Form Nutrition Product Code:	DSO0009
