

SUPER-FOAM EVO

Phosphate Free Foaming
Alkaline Cleaner

Super-Foam EVO is a highly effective, concentrated, alkaline cleaner with superior soil penetrating and surface adhesion ability.

Why choose Super-Foam EVO?

- Free from phosphates, glycol ester and chlorine.
- Excellent foaming, easy application and rinsing.
- Active foam structure with a highly visible presence with optimal coverage and rinsability.
- Long lasting foam, allowing for longer contact time with optimal adhesion power.
- Labour and water saving meaning excellent cost per use.
- Contains a solvent to help improve the removal of heavy soiling.
- Contains GLDA (Tetrasodium N,N-bis (carboxylatomethyl)-L-glutamate), which is a powerful chelating agent made from biodegradable, naturally occurring raw materials and functions as an effective preservative.
- Contains APG (Alkylpolyglycosides) a non-ionic surfactant, biodegradable and plant-derived.

Application

General cleaner

Livestock housing

Equipment

DIRECTIONS FOR USE

Wear appropriate Personal Protective Equipment (PPE).

It is recommended that heavy soiling or contamination and debris should be removed by brushing or scraping prior to application of Super-Foam EVO.

Foam applications: Use a dilution of 1:100 (100 mL per 10 L of water) and apply using an appropriate foam generating lance. The foam should be allowed to remain in contact with the surface for 20-30 minutes. Rinse off the area with clean water using a power washer. Allow to dry before disinfection.

Low pressure spray cleaning: Recommended dilution 1:100 (100 mL per 10 L of water) depending on level of soiling; heavily soiled areas will require a higher concentration of solution. When time allows, pre-wet/soak surfaces before applying the prepared detergent solution, this step will reduce both the water and time consumed during the overall cleaning process. Apply 250-300 mL/sq m of prepared solution. Rinse off the area with clean water using a power washer. Allow to dry before disinfection.

Manual cleaning and immersion of equipment: Prepare a fresh 1:100 (100 mL per 10 L of water) solution for soak tank or immersion cleaning. Scrub and rinse thoroughly in clean water after soaking. Replenish the solution daily.

Specification

Composition	Cleaner
Colour	Amber
Viscosity	Thick liquid
Fragrance	Characteristic
Pack Size	5 L, 25 L, 200 L & 1000 L (IBC)
Storage Conditions	Store in a cool, well-ventilated area. Keep container tightly closed
